
THE HARVEST

Monthly newsletter for Apple Harvest Users Group

USER GROUP CONNECTION

November 1989 Issue

From the Editor

The very first thing for me to do this month is to apologize to Jeff Siler for not getting his DOM article in last months newsletter. I know that Jeff went to alot of work to get the article written for the newsletter and some where along the line, I lost track of which disk his article was on and therefore didn't find it in time to put into the newsletter. I'm sorry about this and will strive to not have this happen in the future, I hope that Jeff will still talk to me.

Well the month of October flew by and I am at the computer again putting out the next issue of The Harvest. The next few months should be very interesting and exciting for the club. We have the club elections coming up, with the nomination being at the November meeting and the elections to be held in January. The new club officers will take office in February. The meeting in November should be exciting with Mary Beth Coyne from Broderbund demoing the New Print Shop and Where in time is Carmen San Diego. Plus, she might have a few other surprises for us. We will also have some door prizes from the wonderful people at Broderbund, this should be one of the better demos of the year. We will also be taking nominations for club officers. The EB has decided on a few rules for nominations: A person can only accept one position. The person that is nominated must be present to accept the nomination. As a personal note to the nominees, if you are nominated for a position, you will be given the opportunity to write an article for the newsletter that will be mailed out in December. Your article must be 300 words or less and written in Appleworks file. Your article must be turned in by Dec. 8. (Note the special date) I hope all the nominees take the time to write an article for the newsletter.

For the December meeting we are going to have party, more information on this inside this newsletter.

For the January meeting, we will have the people from Timeworks out to demo their fine line of software. The main event is the elections of the new club officers for the coming year. I would hope that all the current members can make it to this meeting to vote on the person of their choice. I don't think I need to tell you that this is the one time of the year when you can decide in which direction you want the club to go. Also at this meeting we will be voting on a amendment to the constitution to add a 7th person to the executive board. The position that will be voted on will be Educational Liaison. This person will be the liaison between the school districts in the area and Apple Harvest. If this position is approved, we will than be voting for a person to fill this position on the ballot.

I am thinking about having a Sig meeting on Appleworks GS, if you are interested in attending one or in helping, please see me at the next meeting. This Sig meeting would probably be held on a Saturday. I hope that everyone likes the new print on the newsletter, that is if I have found someone with a GS that is hooked up to a Laser Printer. I tried the people at SSC, everyone was real nice and said I could, but they can't hook their GS to the Laser Printer yet. Scott had a friend with a Laser Printer (I wish I had friends that could afford one), but I got a message at the last minute that his friend had sold the Laser Printer. Well, Brenda is going to try the folks at AC3 and see if they will allow us to print the newsletter out on their Laser Printer. Wish me luck.

Well, its time to get off the typewriter and into my page layout world. See you at the meetings and the party.....Mike.

BOOT UP WITH BUNGLER

By Ron Hochevar

Well, here goes round two of "Boot Up". Hope everyone had fun at the last General Meeting...in case you were unable to attend, it was a little different than most of the previous meetings in that there were no guest speakers and we pretty much confined the meeting to topics related to club business. A motion was proposed and passed that we nominate officers at the November meeting and then have the actual election in January. Most everyone agreed that December was not a good month for elections because of the holiday season. If possible, I urge everyone to attend the November and January meetings so that your nominations/vote will be counted!

I've been checking out the hard drive market as of late. As most of you probably already know, there are a lot of companies now offering hard drives for the GS. Applied Engineering(Vulcan), Applied Ingenuity(InnerDrive), CMS, Chinook, etc., just to name a few. I recently requested and received some information on a drive from a company called American Micro Research (AMR for short...formerly MicroSCI). They are now offering (as well as several standard SCSI hard drives) a drive that they describe as a 45 megabyte "removable media" type. That is, you can remove the existing cartridge and plunk in another one with 40+ more megs of storage! Sounds interesting. I plan to make a trip down to the factory to take a look at them(They are located in Chino). I talked with a company representative over the phone and tried to line up a demo for our group, but unfortunately, was unsuccessful. Another recent product that might be of interest to our members is a new 3.5" 800k disk drive offered by AMR that is compatible with the GS, IIe, IIcPlus and Mac. They are being advertised by mail order for under $200, quite a price reduction from the Apple 3.5" drive(which I purchase recently, after I had enough of the fighting the one disk drive, pop the floppy copy disk blues!)

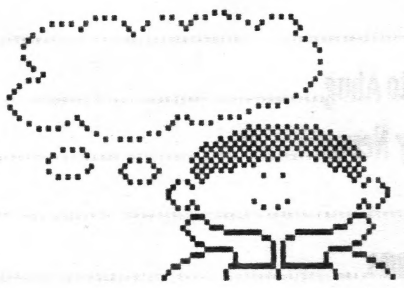
Kim Watrous and myself are planning on organizing a club library containing public domain GS software. Kim came up with the idea of making a list of available programs, circulate the list at the general meetings and let members choose the exact programs they are interested in. We would then copy them from the library and distribute them at the next general meeting. The cost to the member would be for the disk only. Hope to have the library up and running soon! Looking into the crystal ball....Brenda Bunker has expressed a desire to chair a GS special interest group after the first of the year dealing with general areas of particular interest to GS users. The format for such a group would include topics of expertise demonstrated by the members themselves...if you are good at a particular facet of computing, say word processing, drawing or painting with a particular program or programs and would like to demonstrate or learn how it's done, then this group may be of interest to you. Times and meeting places are, at this time, still undetermined. If you are interested, let me or Brenda know and we'll put your name on a list and be in contact with you before the group meets.

I came up with the idea the other day that with all the talented and creative members in our club, why not sponsor a creative drawing contest for club members? I admit I'm not a terrific artist but I would really like to see other members artwork to demonstrate the potential of computer art. Anyone else interested? Figured I'd bring up the subject at the next EBM or at least the next General Meeting.

Well, time is running short...if any member has a question or suggestion for topics for this column, please drop me a line at the following address or E-mail to Bungler on "The Other Place" BBS or "Pot Liquor" BBS. Send to: Bungler/19313 Katydid Avenue / Bloomington / CA./ 92316

For now.....

Bye from the Bungler



BEAGLE BUDDY BYTES

from Steve Tinling

If you are having trouble with your timeout applications, your names may be too long. When you are naming your directories and subdirectories, you need to keep them under thirty-one characters, or TimeOut shortens the name for you. When TimeOut goes looking for the application the names have been shortened and cannot find an exact match. So if you're having trouble with Timeout not finding your applications, shorten the names. HINT: When you set up AppleWorks to use TimeOut, replace the long name they use Applications with something shorter.

Super Font, Desk Tools, and TeleComm updates for AppleWorks 3.0 are out. I hope to have them at the next meeting. Call me if you want the updates and I will bring them to the next meeting if I have received them by then. (Remember to bring your original disk as well as a blank disk or $1 to trade for the new copy.)

I'm Still waiting for the ROM chip for my SCSI card for my CMS Hard Drive. I've been waiting since before AppleFest.

Received my copies of Apple Journal, the monthly newsletter from NAUG and they are excellent. Recommend a subscription to anyone interested in AppleWorks or TimeOut.

What Happen!!!!!!!

The following is a general summary of what happen at the General Meeting of Apple Harvest, Oct. 23.

The meeting was called to order at 6:55 pm.

Rich told us of his conversation with the Librarian of Moreno Valley Library, and the list of rules he was given. We are not allowed to hold raffles, in fact no money is to be exchanged. Suggestions were discussed about a possible change of location of the General Meetings. Any ideas will be welcomed.

Ann Bosard and SSC would like for the members to make out their Christmas lists and let her know what items they would like her to stock in her store. She would like your input very much.

From now on membership renewals will be sent to: Apple Harvest Users Group, P.O. Box 7763, Moreno Valley, Ca. 92303-7763.

The upcoming meetings were announced with November having a representative from Broderbund coming out. December will be the Christmas Party, location still to be announced. January will have TimeWorks demoing their software; February will be Hard Drive demo from First Class Peripherals; and March will feature programs by Roger Wagner Publishing.

S.I.G. signups were talked about, and the need for the chairmen of each S.I.G. to get together with our club President, Rich Mares, about the time and place of their next meeting.

The treasurer's report was given:

Petty Cash	$ 93.43
Checking Account	479.77
Kitty	103.25

	$676.45

The need for a GS librarian and Mac Librarian was brought up.

A virus in an Apple program was announced. Knowledge of the program name is not available at this time, but we will let you know as soon as we get that information. A general discussion about virus and how they pertain to the GS ensued. Also a new System disk for the GS was talked about. System Disk 5.0 is being replaced by 5.2.

A motion to amend a section of the Constitution was given by Charlie Powell. The motion was to change the Executive Board Elections to January so that the December meeting could be dedicated solely to the Christmas party. A general discussion insued about the exact wording of the amendment concerning the months of the nomination and election; and as to whether proxy votes would be allowed. The majority of the membership seemed in agreement that members should be present at the meeting in January to be able to vote. They also agreed that the nominations would be in November and the Elections in January. The general membership voted on the amendment and decided to change the section of the Constitution concerning the elections to read as follows:

The nominations for the EB would take place in November, with the Election in January. The transition from the out-going EB to the new EB would take place at the EB meeting before the February meeting.

Our Telecommunication S.I.G. leader Richard Reid, told the members that the next meeting of his S.I.G. would be November 18th at the library, if they have an opening on that day.

The meeting was brought to a close at 8:50

The minutes were taken by Jessica and Brenda Bunker because of the absence of Secretary, Fran Langston.

Guess Who's Coming for Dinner at

A.H.U.G.

The following Companies have tentatively agreed to come to the general meetings of A.H.U.G. to demo their products.

Nov. Meeting----------Broderbund Software
Dec. Meeting----------A.H.U.G. Christmas Party
Jan. Meeting----------Timeout Software
Feb. Meeting----------First Class Peripherals
Mar. Meeting----------Roger Wagner Publishing
Apr. Meeting----------Open

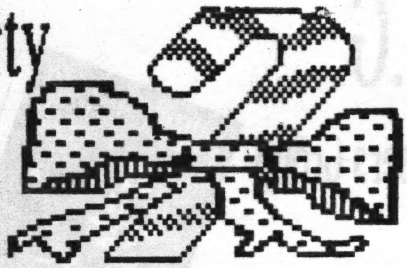
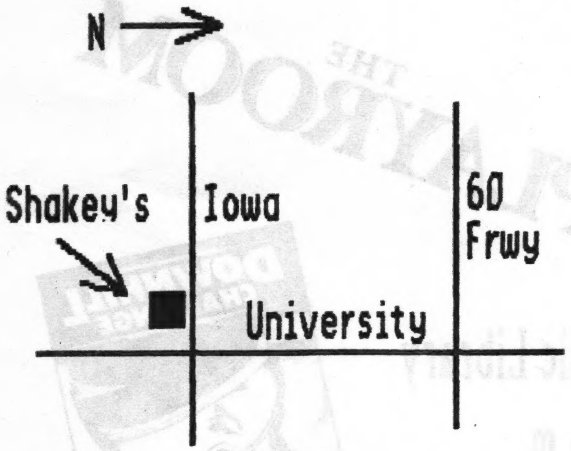
Christmas Party



That is right, its Christmas time here at A.H.U.G. Its cold outside and the snow is falling (oh boy, its really 80 degrees), but the fire is so delightful. So if you have no place to go, heck, come to the first annual A.H.U.G. Christmas Party. In fact, you can bring the whole family to the party. This years Christmas party will be held at Shakey's Pizza Parlor in Riverside. The address for Shakey's is 3767 Iowa Ave., Riverside. We have reserved the TV viewing room for the night, so we will be in a room for ourselves. The party will start at 7:00 P.M. and end at 9:00 or later. The Exective Board has voted to spend $75.00 on the party for food and drink (the soft drink kind only) and other suprises. Any food or drink that you want over what the club buys will be your responsiblity, but we should have enough to get the food and soft drinks going. We will also have a general gift exchange, with the gifts not costing more than $10.00. The gift exchange should prove to be alot of fun and laughs. You are not required to bring a gift, but only those that do will be in the gift exchange. Below you will find a map of where Shakey's is located at in



Shakey's Pizza Palor

3767 Iowa Riverside

Monday December 11 7:00 P.M.

Tip of the Month

Are you forever running out of labels to label your floppy disks? Well, an inexpensive solution is to buy mailing labels from Radio Shack. You can get 1000 "Fanfold Labels" for around $5.95. These labels are 3 1/2 inches wide and 15/16 inches long. By cutting the labels in half, you can get 2000 nice-sized labels, enough to last a couple of months at least.

Surprisingly enough, you can also use these as mailing labels. For instance, you can print yourself up some return address labels using almost any word processor. Simply set the page length to one inch, and the left margin to zero. Type out your address, and you're off and running.

However you do need to have movable tractors on your printer. Friction-feed printers cannot keep the labels appropriately aligned. And non-movable tractors are basically stuck in the mud.

Phil Shapiro

Beginning AppleWorks Classic S.I.G.

For the patient members of A.H.U.G., who have needed help getting started using AppleWorks, the club's AppleWorks Classic S.I.G. will meet on Saturday, December 2nd. We're going to get together over at Brenda's house from 10am till about noon to discuss and discover the AppleWorks program. If you are interested in attending, please call Brenda at 242-4317 and ask for directions to our house.

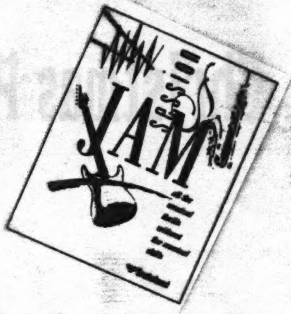
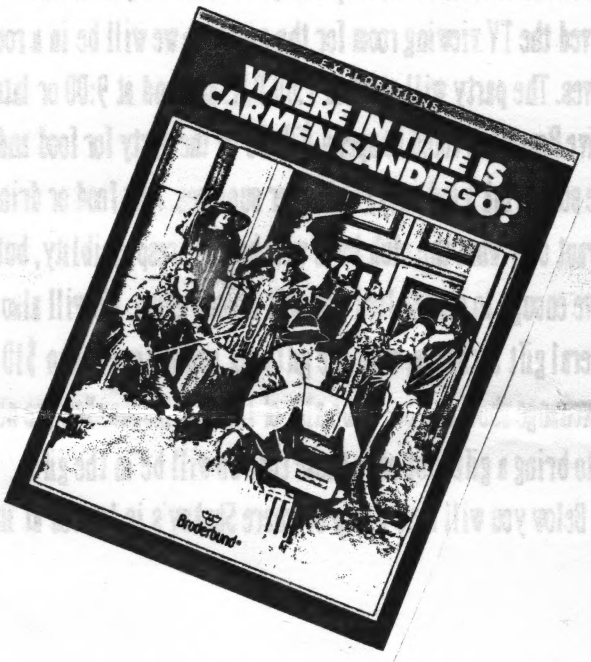
Apple Harvest Users Group



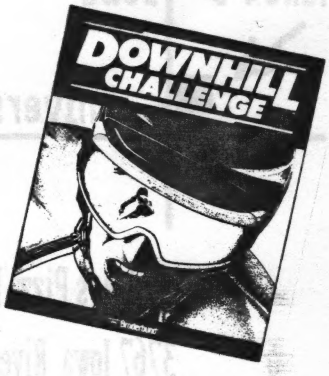
WELCOMES . . . Broderbund



We have invited a representative from Broderbund to come to our General Meeting and demonstrate some of their newest software to our members. We are happy to announce that Mary Beth Coyne, from Broderbund has agreed to come and show us many of the newest software coming out for Christmas and after the 1st of the year, from her fine company. Some of the the programs to be shown will include "The New Print Shop" and "Where in Time is Carmen SanDiego". The demo should prove to be entertaining!

The Dark Heart of UNKRUL™

THE PLAYROOM™



Place: Moreno Valley Public Library

Time: 6:00 - 9:00 p.m.

Date: November 27, 1989

Broderbund®

What's new at Broderbund

With Broderbund coming out to demo some of their new games at the November General Meeting, I thought that you might like to hear a little about the programs.

The New Print Shop

Compatable with the IIe,IIc and IIc Plus, you need 128 K and works with most interface cards. Some of the features are high resolution graphics, multiple graphics per page, multiple fonts per page, multicolor printing, vertical and horizpntal signs, greeting cards and banners, ability to shrink greeting cards and quick print feature.

The New Print Shop Companion

This program features designs and prints envelopes, Flyers, and reports. Editors for customized graphics, borders and fonts.

The Playroom

This program is compatible with the II family and most Mac's. You will need at lease 2-5 1/4 in. or 1-3 1/2 in. disks on the II family and at least 2-3 1/2 in. disks on the Macintosh line. You need 128 K on the II's and 1 meg on Mac. The Playroom is a set of games and activities built around the theme of a child's playroom. In The Playroom, the child can select any object in the room and something fun will happen. Some of the activities teach reading or math readiness, others deal with creativity, and others are just plain fun! The Playroom is targeted for ages 3 thru 6.

Where in Time is Carmen Sandiego?

This is compatible with the IIe/IIc/IIcPlus and the II GS and you will need at least 128 K. You will chase Carmen and her gang through 1500 years of world history, picking up clues on historical events, scientific inventions and famous people. Players use the Acme Detective Agency's time travel machine to question witnesses and scan for clues. You will chase Carmen and her gang of fifteen V.I.L.E. henchman through twelve countries in four different time periods. The targeted age group for this is 12 to Adult.

The Dark Heart of Uukrul

Game is compatible with IIe, IIc, IIc+ and the IIGS. You can use either Color or Monochrome monitors. You will need 2-5 1/4 in. or 1-3 1/2 in. disk and 128 K of memory. You will lead a fighter, paladin, priest and magician on a perilous adventure into the depths of the mountain city of Eriosthe to destroy the evil Uukrul. The game features animated combat, and intriguing plot and challenging puzzles to teat the player's wits and intelligence. This is for you fantasy role playing enthusiasts ages 13 and up.

Downhill Challenge

This is for our II Gs owners only. You will need one 3 1/2 in. disk and 512 K of memory. This is and interactive ski racing simulation which features a choice of four popular types of skiing: Downhill, Slalom, Giant Slalom, and Jumping. Has the real simulation of Downhill Skiing. 3-D view and horizontal/vertical screen scrolling techniques let players experience the thrill of skiing. For all you action and skiing enthusiasts between the ages of 8 to adult, this could be the game for you.

Prince of Persia

Compatible with the IIe, IIc, IIc+ and the II GS. You will need 128 K of memory. This is an action-adventure game with challenging puzzles, fast action, and incredibly lifelike animation. You will have twelve levels with many different opponents of increasing difficulty and the most realistic animation ever seen in a computer game. You have a save-game feature.

Jam Session

This program is for our Mac users. You will have to have a Mac 512K/Plus or SE. You will nee 3-3 1/2 in. disks and at least 512 K of memory. This is a music performance program that enables anyone to play professional-sounding music without having any musical background or knowledge. You need no musical training and you can make great sounding music instantly. Jam Session was showcased by Todd Rundgren on his 1987 tour.

This are just a few of the programs that the good people at Broderbund have put out. This should be one of the better demo's of the year and just in time for you to get an idea of what to buy for the kids. Or better yet, what the kids can buy for mom and dad. With Mary Beth Coyne demoing programs like Print Shop, for you graphics people and games for all us big kids who like to play games, this should be a meeting that everyone should enjoy. Hope to see you at the meeting.
